MANUFACTURING TECHNOLOGY

At **PortaLite**, we operate a manufacturing facility in Mexico equipped with cutting-edge technology for producing portable aluminum Tube+Fabric systems. We design and manufacture lightweight, durable, and easy-to-assemble tubular solutions with high-resolution graphics, enabling the creation of versatile and visually striking displays, all while maintaining high-quality standards and efficient delivery times.

IMAGINE A GREAT PRINTING

Imagine large-format graphics
Specialized infrastructure for fabric
printing through dye-sublimation,
using high-speed large-format
printers capable of producing
up to 220 m² per hour and print
widths of up to 3.2 meters. This
process ensures vibrant colors,
sharp definition, and excellent
consistency across every graphic
for maximum visual impact.
Our quality process spans from
template selection and sample
approval to final product
delivery. Attention to detail is
maintained throughout every stage
to ensure precision, consistency,
and outstanding visual results.

PORTALITE

Aluminum tubular frames with sublimated fabric graphics offer an elegant, practical, and sustainable solution for showcasing your brand or message across all types of events. Their lightweight, durable, and reusable materials help reduce the need for disposable structures without compromising visual impact or aesthetic quality. These displays combine design, functionality, and environmental responsibility to deliver immediate visual presence. Thanks to their fast, tool-free assembly, they enable efficient setup, optimize time, and support long-term use across multiple applications.
